

Agenda item 8

For discussion: Developing a Green infrastructure strategy for Frome

Authors: Jane Llewellyn, Planning and Development Manager and Chris Stringer, Environment Manager

Green Infrastructure is a term used to describe open spaces, public access routes and wildlife corridors including the river. Importantly, the term considers the collective value of these spaces. Green Infrastructure includes established as well as new sites that thread through and surround the town.

Christ Stringer and Jane Llewellyn will explain more about what green infrastructure is on the ground and also in the context of the Neighbourhood Plan and the Mendip Local Plan and why it is important to develop a strategy in Frome. They will then lead a discussion on with the aim of receiving a steer from the meeting on how to take it forward.
