

REPAINTING STAND TO BE RED METAL WITH SPRAY PAINTED SIGNAGE

POTENTIAL FOR SITE WIDE BRANDING

REPAINTING STAND TO BE RED METAL WITH SPRAY PAINTED SIGNAGE

#WEAREBA11

**ELEVATIONAL AESTHETIC OPTION 2:**

One section of the changing room is set forward to break up the mass of the building

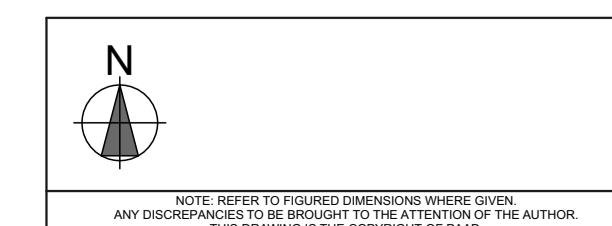

The two elements are further defined by using white render on one and red metal cladding on the other

There is further opportunity to use this as a design language around the site going forward. For example existing storage containers around the site painted to match the metal cladding with the same identifying signage.

Club logo located centrally on facade

Red doors and windows to reflect club branding

Rooms signposted with large external lettering to aid visitors to the site. Branded to reflect Frome FC #WEAREBA11
